

GUESSING THE WORD GAME PROPOSAL

1. Introduction

The "Guessing Word Game" is a fun and engaging activity designed to help players unwind and take a break from the stresses of school or work. In this game, players are challenged to guess a randomly selected word, testing their vocabulary and problem-solving skills. The game also features a scoring system that tracks players' success, providing an additional layer of motivation and achievement. The game's goal is simple: to relax and have fun while challenging your mind. Whether you want to take a quick break or spend some time unwinding, the "Guessing Word Game" offers a perfect way to recharge and enjoy light-hearted entertainment.

2. Objective

- Guess the randomly selected word within a limited number of attempts.
- Earn points based on the number of correct guesses and word difficulty.
- Challenge your vocabulary and problem-solving skills.
- Enjoy a fun and relaxing gameplay experience.

3. Key Module and Features

- **User Information access and control:** Manage and store player profiles, including tracking scores, progress, and game history.
- **Game feature:** Provide a seamless and engaging gaming experience with intuitive users to guess the randomly selected word within a limited number of playing times and earn points based on the correct guesses word.

4. Implementation

4.1. Requirements Analysis

4.1.1. Functional Requirements
